Situation Report for August 8, 2003 (issued @ 14:00 hrs.)

Wildfires of 2003

Attention * - New information shown in today's report displayed in ***Bold Italics*** type.

I. Montana Fire Conditions and Background Information:

Initial Attack Activity has been considered very successful throughout the Northern Rockies during the 2003 Fire Season. There were 155 new starts on Wednesday with only 18 unable to be controlled. During the Past 3 days there have been more than 300 new fires starts and initial attacks.

Due to storms moving through Montana over the next few days, new starts are expected to occur. A season ending weather event is not predicted to occur until the end of September or first part of October. A vigilant fire watch is expected to continue as a result of these predictions.

Current concerns include the continued management of fires within the Flathead Area Command as well as the Slims and Black Frog Complex fires. In addition, the Deep Fire, located near I-15 a few miles south of the Montana state line on the Idaho/Montana border, reached 23,000 acres last night due to gusty winds that continue to push it through grass, sagebrush, and pockets of timber. Authorities in Montana continue to track its progress.

The Flathead County Board of Commissioners passed a resolution on August 4th, 2003 stating that because the weather forecasts indicated no relief from the dry conditions and fires continued in the county it was "resolved that stage II fire restrictions on all State forested lands and all private forested lands open to the public" will be in effect until otherwise stated.

The National Guard will be rotating in new air crews in Helena and Kalispell this weekend.
- One NG Liaison Officer has been assigned to the Northern Rockies Coordination Center (NGCC) in Missoula.
- MT Highway Patrol and MT Department of Transportation are supporting fire efforts with local jurisdictions and fire management to limit travel disturbances.
